

On Deck With Lucy

Bite Your Tongue and see NY Talent.

Last night I had the pleasure of experiencing a fiercely, passionate and outrageous show that pushes boundaries in so many ways. *Bite Your Tongue*, is a play that challenges the notions of normality and features wicked and ugly characters who the audience are still able to recognize themselves in. I found myself being transported to a world of fear, love, anger, passion and hatred all within one act. The cast effected me with their commitment, originality and passion and I am confident that *Bite Your Tongue* will continue to receive outstanding reviews and feedback due to it's raw perspective on life.

The whole cast delivered incredible performances however there were two young actresses that really stole the show for me. Tali Custer portrayed a vibrant, sensual and moving character who proved that beauty can come with a price. Her versatile skills as an actress kept the audience entertained while continuing to push boundaries within the play and her role.

The Second act was my favorite as Audrey Lorea graced the stage with her deeply moving monologue. Audrea had been introduced to me through talented film director and writer Gabe Rodriguez and when meeting her I was overwhelmed by her charm, beauty and presence. Audrey delivered a gripping, emotional and exquisite performance, capturing the audience with her spontaneity and presence.

If you are in the city and looking for raw talent and original material *Bite your tongue* will not disappoint.
